Professional Summary

Software Engineer with 6+ years of experience building scalable backend systems and transitioning into Data Science. Skilled in Python, SQL, Statistics, Machine Learning, Scikit-learn, PostgreSQL and Streamlit. Built production-style ML systems including data generation, SQL feature engineering, model training, inference, dashboards and deployment.

Technical Skills

Python • SQL • Pandas • NumPy • Scikit-learn • Random Forest • XGBoost • Classification • Regression • PCA • Statistics • Plotly • Matplotlib • PostgreSQL • MySQL • Streamlit • Git • AWS

Professional Experience

Software Engineer | Capital Numbers (Jun 2022 – Present)

- Designed scalable backend services and production APIs.
- Optimized SQL queries and database performance.
- Translated business requirements into technical solutions with cross-functional teams.
- Resolved production issues and improved application reliability.
- Applied modular architecture, version control and engineering best practices.

Software Engineer | IndiaNIC, MMF InfoTech, We2Code (2019–2022)

- Developed enterprise web applications and REST APIs.
- Worked extensively with relational databases, cloud deployments and client communication.

Projects

Property Asset Intelligence Platform

- Developed an end-to-end ML platform for predictive maintenance and inspection prioritization.
- Designed PostgreSQL schema and generated synthetic enterprise data.
- Built SQL feature engineering pipelines using joins, CTEs and aggregations.
- Implemented Scikit-learn pipelines, feature engineering, model evaluation and inference.
- Created interactive Streamlit dashboards with KPI metrics, Plotly visualizations and live predictions.

URL -: <https://property-asset-intelligence.streamlit.app/>

Earthquake & Tsunami Risk Assessment System

- Building predictive analytics workflows using historical seismic datasets.
- Applying feature engineering, exploratory data analysis and machine learning.

Education

Master of Physics, Rani Durgavati Vishwavidyalaya, Jabalpur

Core Competencies

Machine Learning • Predictive Analytics • Feature Engineering • SQL • Data Visualization • Model Deployment • Statistics • Problem Solving
